

Establish Accountability Through Accuracy.

Why Choose Benelogic?

Data audits help answer important questions that can impact the financial picture of your benefit plans.

We handle benefit data transactions. It's the only thing we do. And we know, the only way to keep ongoing data flowing smoothly between systems is to periodically audit it.

We've managed millions of data files, so our data audit skills are well-honed. We know how to do them quickly and accurately. Even better, we know where, how and why data goes out of kilter in the first place.

Questions

- Are you paying only for people that SHOULD be covered?
- Are terminations being processed accurately?
- Are your employees covered at the level they selected in the products they chose?
- Does the carrier's data match the company's data? If not, then why?
