

Secure. Fast. Out of Your Hands.

Why Choose Benelogic?

You have good reasons for using an in-house benefits management module. But you weren't counting on the headache and challenges that comes with carrier data exchange.

Data exchange is a critical support activity, but it's hard to do right and it ties up your valuable resources. While benefit data exchange isn't your core business, it IS ours.

With Benelogic Deliver™, we'll handle data exchange to lighten your workload.

Contact us to get started today!

Features

- Manage custom vendor and carrier codes
- Secure, trackable data delivery
- HIPAA 834-compliant transactional or full files
- Leverage existing carrier and vendor relationships
- Robust process tracking with discrepancy management
- Secondary data validation on carrier files before delivery
